Film Capacitors

RTI Electronics offers a complete line of metallized polyester, metallized polycarbonate, metallized polypropylene capacitors, as well as film and foil versions. Standard catalog case styles include tubular hermetically sealed, wrap-and-fill, both oval and round, rectangular plastic-case, both axial and radial leads, and cylindrical plastic-case with axial leads. In addition, the company has a demonstrated capability in the design and production of capacitors to special parameters and configurations: multiple component assemblies, matched tolerance groups, extremely close-tolerance units, special voltage ratings, AC application types, and many others. Also available are **feed-thru** capacitor sections, both dry and impregnated.

The RTI Audio division is comprised of serious audiophiles. We have been producing high quality audio film capacitors since our inception and we look forward to fulfilling your high-end audio requirements. Our high quality audio line of film capacitors consists of: metallized polypropylene, film and foil, **custom interleaf**, oil impregnated and polystyrene, at a variety of price points.

TYPE R, D & B (METALLIZED POLYCARBONATE)	TYPE J, X & Z (METALLIZED POLYESTER)	TYPE G (METALLIZED POLYPROPYLENE)	TYPE M (POLYESTER AND FOIL)	TYPE P (POLYSTYRENE AND FOIL)	TYPE L (POLYPROPYLENE AND FOIL)	TYPE C (POLYESTER KRAFT AND FOIL)	AUDIO FILM CAPACITORS
