The output of the 5360 series of load detectors when terminated with a 100 ohm resistor. Ip ranging from 0.25 to 2.5 times the rated current.

VL vs RL curve shows the output of the 5360 series of load detectors (including the LD-50) at rated input load current Ip with load resistance RL varying from 10 to 20,000 ohms.

VL/N.Ip vs. Frequency curve shows the output of the load sensor as a function of frequency across a 100 ohm terminating resistor at rated primary current. (20A for LD-50)
