Running Springs Audio Powers 8th Annual Rocky Mountain Audio Fest

Company Partners with Exhibitors to Ensure Flawless Audio/Visual Continuity

October 5, 2011—Anaheim, CA—[Running Spring Audio](#) (RSA), a leading manufacturer of high-end audio power devices combining proprietary technology with superior design specifications, announced today that it will be exhibiting within and powering Apex Audio, Musical Surroundings, Alfred & Partners—Estelon Loudspeakers, Bel Canto, and Modwright Designs at the 8th Annual Rocky Mountain Audio Fest.

RSA will be highlighting its entire audio line of power devices [Haley](#), [Duke](#), [Jaco](#), [Dmitri](#), [Maxim](#) and [Elgar](#), and its flagship power cords: [Mongoose](#) and [HZ Crown Jewel](#).

Audiophiles from around the globe will gather at the event in Denver, Colorado from October 14-16, to experience and participate in demonstrations from over 1,100 exhibitors. A proud partner of many exhibitors, RSA will be providing audio power devices for the following and their corresponding room or suite:

- Apex Audio—Blanca Peak
- Musical Surroundings—Maroon Peak
- Alfred & Partners/Estelon Loudspeakers—Room 517
- Bel Canto—Room 557
- Modwright Designs—Room 1010

“We are pleased to partner with Running Springs Audio,” said Carl Jerritts, of Apex Audio. “RSA products provide the best power conditioning in the industry. Over the course 20-plus years in the high-end audio market I have evaluated a multitude of products and Running Springs consistently, year after year, comes out on top.”

Join Running Springs Audio at Rocky Mountain Audio Fest to see and hear for yourself and learn what RSA can do for your audio/video systems.

About Running Springs Audio: Running Springs Audio (RSA), a [RTI Electronics](#) (RTIE) company, power devices are designed and manufactured in Southern California with Proprietary Precision Capacitance Technology (PPCT) to provide managed differential power distribution to audio/video systems. All RSA products are non-current limiting allowing components to operate at optimum levels. These extraordinary power products will establish coherence throughout an audio or video system; music becomes more natural, detailed, three-dimensional and life-like, while video becomes more vivid, showing superior detail and enhanced depth. All RSA products have earned the esteemed CE/CB international safety rating and offer a variety of safety devices that protect even the most complex systems.
